- ✔ Unique cooling system – to enhance your comfort
- ✔ Suitable for all skin types

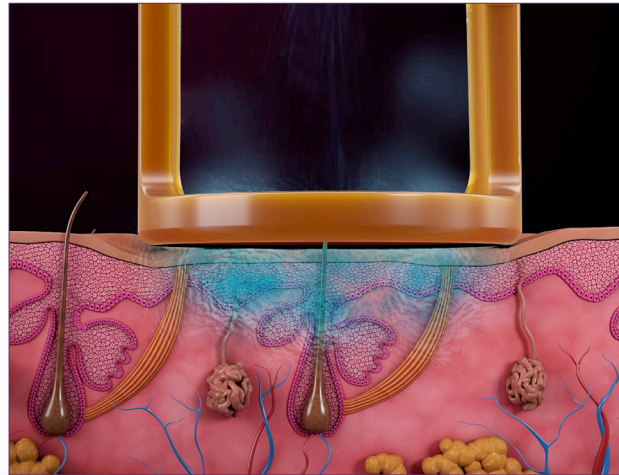

Gentle Pro™ lasers are trusted by healthcare providers around the world

- ✔ Providing permanent hair reduction and patient satisfaction in 86 countries around the world

20 years of patient satisfaction

Don't let the name fool you. Gentle Pro™ lasers are powerful, state-of-the-art devices that deliver permanent hair reduction quickly and efficiently. Gentle Pro lasers work by selectively targeting the hair follicle with intense pulses of light energy for thermal destruction, but without damaging the surrounding tissue. This epidermal protection is provided by the Dynamic Cooling Device™ (DCD™) cooling system which sprays the skin before each laser pulse with a liquid coolant. This cooling system is also adjustable, making sure the procedure is as comfortable as possible for individual needs.

Gentle Pro™ lasers are a world recognized leader in laser hair removal and also treat a myriad of other skin conditions. Ask your provider if Gentle Pro™ Laser treatment is right for your needs.

The leading hair removal brand chosen by dermatologists²

What you can expect

What is a Gentle Pro™ treatment like?

- 1 The duration of each session varies from person to person, but on average they last about 20 minutes.
- 2 Because hair grows in stages, multiple treatments are required. The number and timing of these treatments will be determined by your provider.
- 3 Laser hair removal treatments are commonly described as similar to having an elastic band snapped against the skin during treatment. A topical anesthetic can be used before treatment if desired.
- 4 After the treatment, a cool compress or gel pack may be applied. If you do have any redness or swelling after treatment, this should resolve in a couple of hours. Permanent side effects are rare but should be discussed with your provider.
- 5 You will be able to resume normal activities after each session, but you may be given specific advice, such as avoiding sun or abrasive skin cleansers on treated skin for a few days.
- 6 You should always follow specific instructions from your healthcare provider.
