

Carboxy therapy is a non-surgical method in which Carbon DIOXIDE (CO2) is injected into Tissue through a needle. From the injection point carbon dioxide diffuses easily into Adjacent tissues. Carbon dioxide is used to treat cellulite, stretch marks, dark circles, hyperpigmentation, fibrosis. It causes dilation of blood vessels on the capillaries in the area. Wider vessels mean bigger and stronger blood flow to the area or more available oxygen. Side effects include mild pain, swelling, burning and or bruising at the injection site.

I understand that to achieve optimal results multiple treatments are necessary. I am not pregnant or trying to become pregnant nor am I nursing at this time. The nature and purpose of the treatment have been explained to me. I have read and understand the attached agreement(s). All of my questions have been answered to my satisfaction and I consent to the terms of this agreement. Alternative methods of treatment and their risks and benefits have been explained to me and I understand that I have the right to refuse treatment.

I release ME AESTHETICS and its medical staff, and specific technicians from liability Associated with the procedure. I certify that I am a competent adult of at least 18 years of age. This consent form is freely and voluntarily executed and shall be binding upon my spouse, relatives, legal representatives, heirs, administrators, successors and assigns. Note: All prices are subject to change without prior notice.

Patient: _____ Date: _____

I have discussed the above with the patient and have answered their questions.
